

**2025 – Lab Exam 03
Report**

Student ID	IT23662100
Batch	Y2.S2.WD.IT.01.01
Marking Guide	
1. Functionality: How well the core and bonus features are implemented	3
2. Creativity & User Interface Design: Clean and intuitive UI/UX design	2
3. Code-Quality & Organization: Code is well-organized & documented	2
4. Advanced Features & Data Persistence: Usage of SharedPreferences with one of the advanced features	3
Total Marks	10
Evaluator

Description:

WellNest is an application that assists individuals in building personal well-being and helping to maintain their healthy daily habits. The app integrates a number of wellness features within a single cohesive experience, educating the user to track habits, track moods, and stay hydrated using reminders and interactive features.

The app has a **Daily Habit Tracker**, from which users are able to add, edit, and delete habits and monitor their progress towards completing them. Habit activity for every day is stored persistently in **SharedPreferences** so that user information is stored between sessions.

The **Mood Journal** enables users to record emotions in emotive emojis with date and time, both as a daily record and calendar view of past moods. The mood-tracking system also syncs with the Profile section that displays emotional trends graphically in a **weekly mood chart (MPAndroidChart)** — enabling users to see their overall emotional patterns in a clean, visualized way supported by emojis.

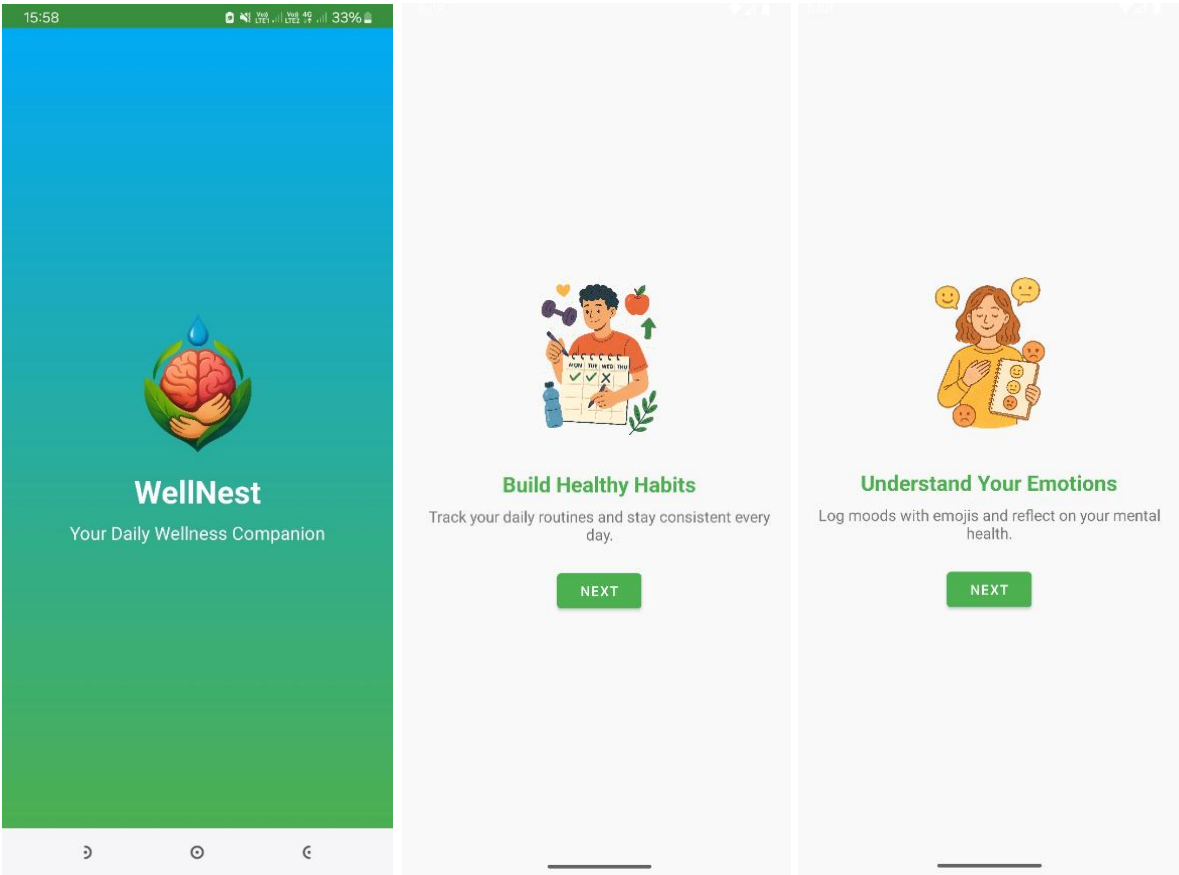

To induce good hydration, **Hydration Reminders** utilize **AlarmManager**, reminding users to drink at preset times. Another feature, a **home-screen widget**, displays daily habit progress for at-a-glance motivation as well as simple navigation into the app's main interface.

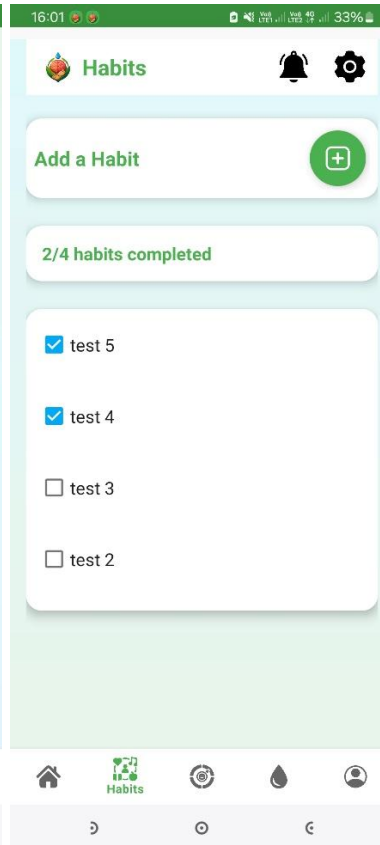

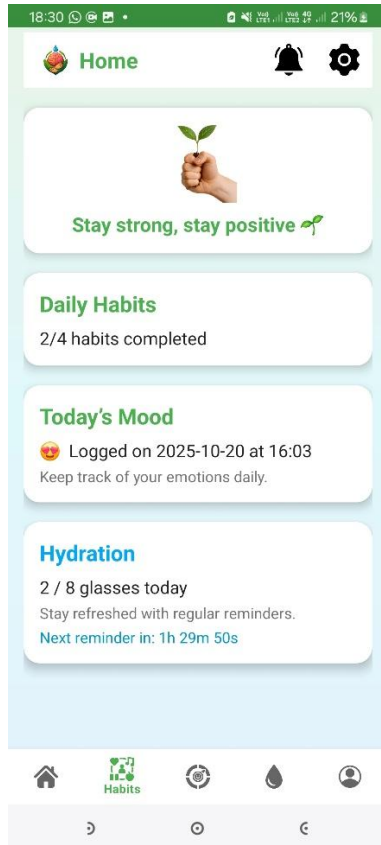

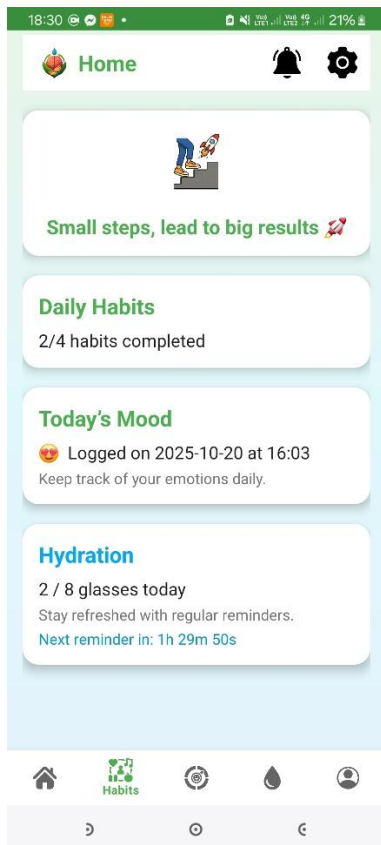

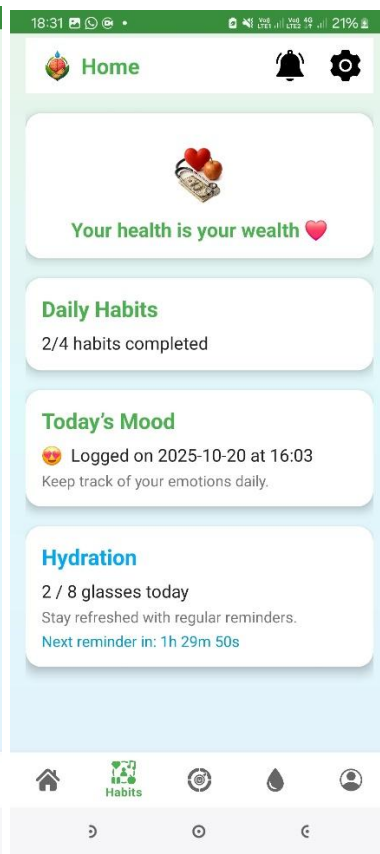

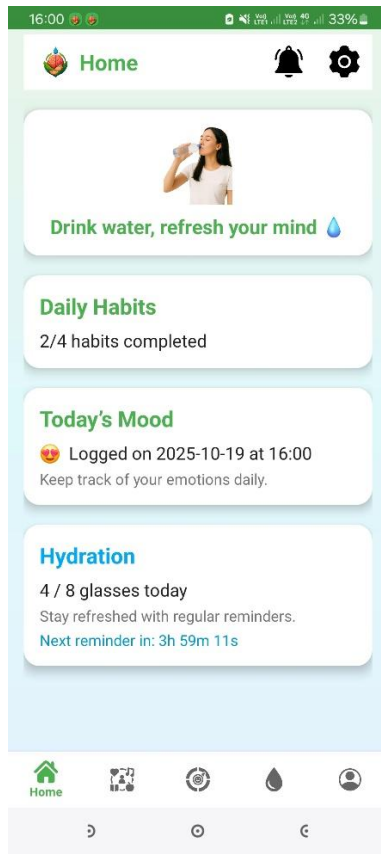

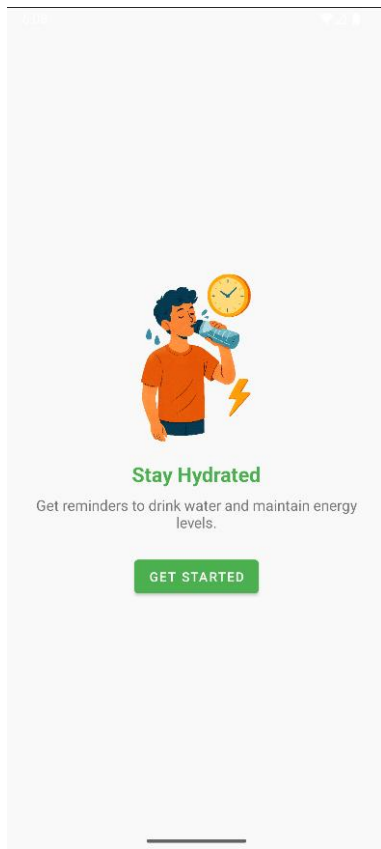

The **Home screen** summarizes the user's current situation using motivational quotes, hydration status, and the most recent mood entry. So, each time the app is launched, it provides a light-hearted experience.

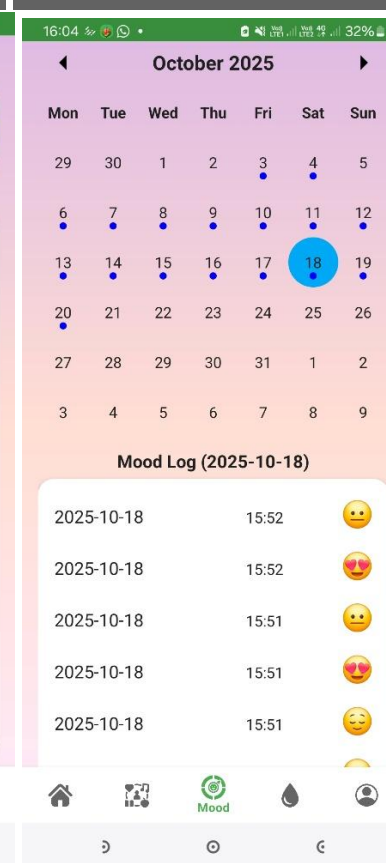

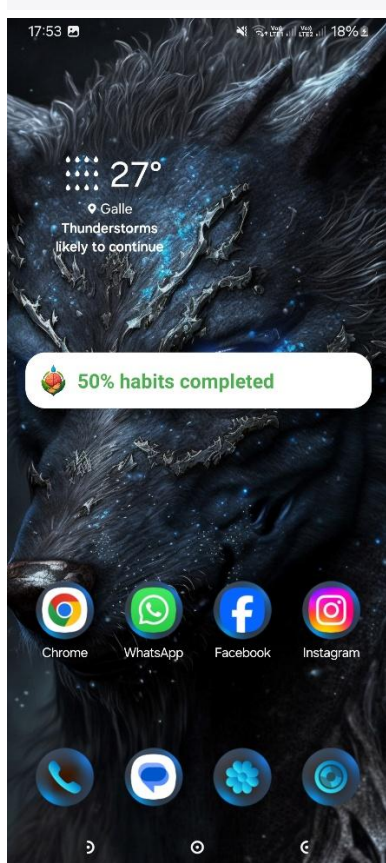

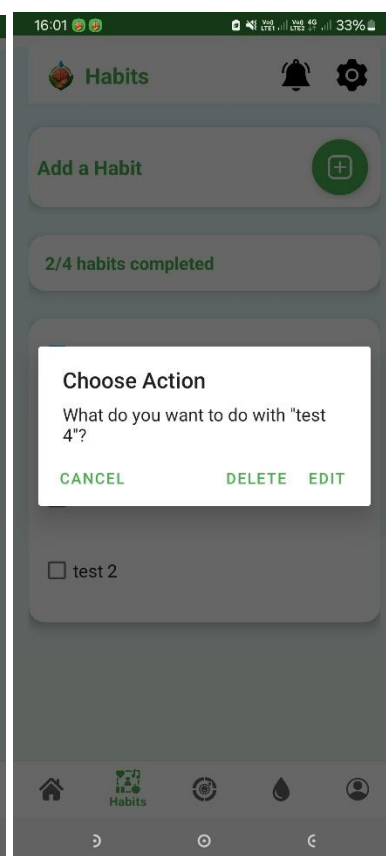

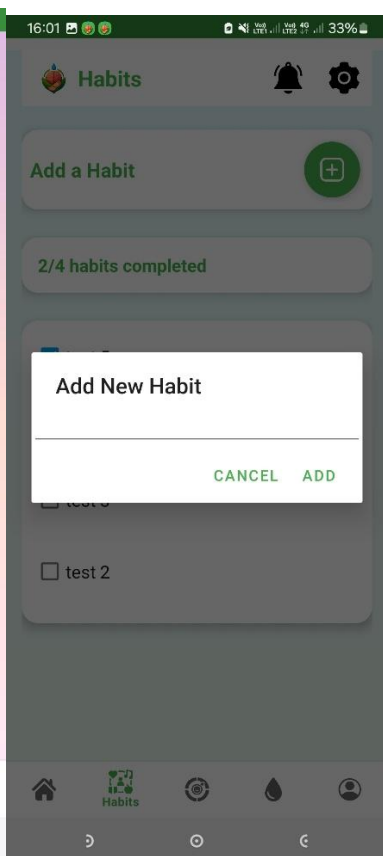

Built in **Android Studio** using **Kotlin**, *WellNest* is focused on a **clean, nature-inspired UI** with soothing greens and blues that represent serenity and well-being. The design scales ideally to different devices and orientations, following **modern Android UI principles**.

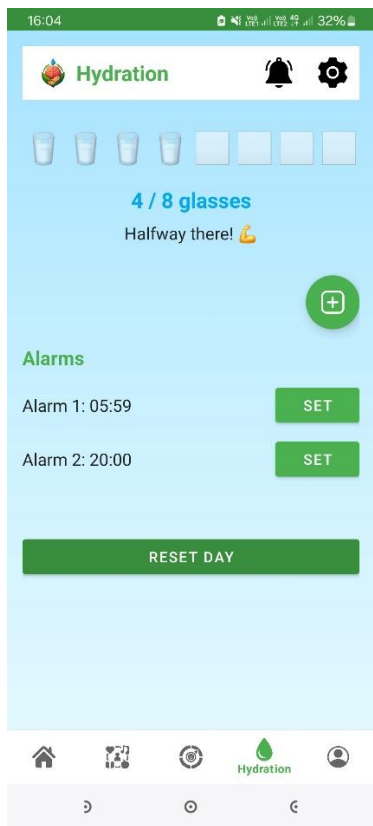

Overall, *WellNest* provides a complete, interactive, and user-friendly solution for personal wellness management, bringing together functionality, elegance, and emotional wellness into one beautiful app.
